ABOUT US

At Star City hacks, we recognize the importance of technology in the lives of students. While tech-related jobs become the future for today's students, there simply aren't enough resources to allow those students to get started early. This is especially bad for the youth of the Midwest, where only two hackathons are scheduled for high school students, out of more than 130 worldwide (The Hack Foundation).

That's where Star City Hacks comes in. We're run by high school students for high school students. We recognize the privilege we've had in being exposed to the highest quality Computer Science education possible and want to share that knowledge with the youth of Indiana. At our Hackathon on November 20, 2022, at the West Lafayette Jr/Sr High School, we're looking forward to bringing together over 150 students of all different backgrounds from all over Indiana. During the eleven-hour event, we'll offer workshops to expose students to a diverse variety of essential Computer Science topics and engage in friendly competition to let students show their true creativity and potential.

HOW YOU CAN HELP US

To provide a welcoming and productive environment to our attendees, we are estimating expenses upwards of **\$10,000**. Your sponsorship will help provide food, prizes, technology, and other necessities for the hackathon, and will directly help students to realize their true potential. Because we're a 501(c)(3) non-profit, your contributions are tax-deductible. You'll also get benefits at the event (see page 03)

Donate Money

We'll put your dollars to work where they're needed most. You'll be able to view our financial reports to see how we spend our money.

Donate Food

Between two meals and plenty of snacks, we need all the food we can get to make sure nobody is left hungry.

Provide Mentors/Judges

We need mentors and judges to make sure participants' questions are answered and talent is rewarded. Mentors will have a chance to work directly with participants. School-approved, valid background checks are required.

SPONSOR BENEFITS

	Startup \$100-\$500	Back-End \$500-\$2000	Front End \$2000-\$5000	Full Stack \$5000+
